

Galetti Articulator

- With mechanical fixation of models.
- All anatomical movements are possible.
- No plaster, no accessories needed, easy to clean.
- At the chair, immediate adjustment of the occlusion—correct reproduction of centric relation.
- For the orthodontist and oral surgeon, perfect for study model. Easy to follow corrections and reductions.

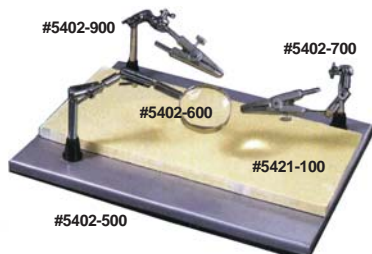

To Use: Tighten the two anterior traction screws to fix the models in centric relation. Adjust the models in their exact occlusion, tighten the posterior joint, then the anterior one.

0116-D **\$379.00 ea.**
