Bausch Articulating Papers

Bausch no-smudge articulating paper is impregnated with a water-insoluble vegetable coating for clear marking — even on wet surfaces. A test bite establishes all occlusal contact points in varying shades of blue or red according to the exact height relationships.

The Dri-Angle™

The ORIGINAL and still THE BEST

A unique replacement and a decided improvement upon the cotton roll in the parotid area. By covering the parotid or Stensen's duct it effectively restricts the flow of saliva.

- Use of the Dri-Angle guarantees a completely dry field for bonding procedures.
- The silver coated Dri-Angle is the recommended choice in orthodontics.
- Thinner than cotton roll, will not limit work area.

Catalog #	Size	OSE Low Price
0097-010	Small - 400 per box	\$16.45 box
0097-020	Large - 320 per box	\$15.95 box for 4 or more
