“SUPER SMILE”

**Roth Technique
 Ceramic Brackets**

- **Made of Polycrystalline Alumina Translucent Ceramic Material** — the strongest and least visible, lets natural tooth color show through (has silane coating).
- **Full Radius Low-Profile** — gives maximum patient comfort and minimal breaking leverage (deflects food particles away from brackets).
- **More Material Between Slots** — means less breakage.
- **Twin Design & Gingivally Extended Tie Wings On Bicuspids** — make for easier and more versatile tying.
- **Smaller Size and Smaller Tie-Slot Radius** — easier to fit tooth, and more tie area.
- **Longer Base** — more support and protects tie-wing slot from adhesive while bonding.
- **2 Distal Grooves In Base** — better grip for bonding.
- **Works Great With Light Bonding Techniques.**
- **Angled Occlusal Base** — makes alignment easier when aligned perpendicular to long axis of tooth.
- **Color-Coded Indicators** — inserted in vertical channel so brackets are easily identified (indicators point in the direction of gingiva and align with long axis of tooth-indicators in bicuspids w/hooks when placed in the archwire slot).
 (Mix or match for quantity price-breaks!)

Sold Individually **\$5.45 ea.**
\$5.25 ea. for 10 or more
\$4.95 ea. for 100 or more
\$4.45 ea. for 500 or more

“SUPER SMILE”

**Standard Edgewise
 Ceramic Brackets**

0° Torque > 0° Angulation

- **Built for aesthetics and strength with the same superb qualities as brackets above.**
- **Single Bracket Design** — gives extra strength for adding torque in wire when required.
- **Same Shape & Profile as Our Pre-torqued Brackets With Larger Tie Slots** — less breakage, less irritation, stronger and easier to legate.
- **Mechanical Grooves in Base** — easier debonding.
- **Only 4 Different Brackets Per Patient**
- **Color Coded Identification** — easy to recognize
