

The Proven Standard Bracket ...

Biocompatible 1 piece construction
Excellent functionality achieved by innovative design

- **Compact Design** - brackets have a lower profile, are comfortable, and aesthetically appealing.
- **Gingival Offset** - ensures that there is no occlusal interference in the premolar area.
- **Accurate Positioning** - mid marking and rhomboid base greatly facilitate the positioning on the clinical crown.
- **Special Geometric Bracket Wings** - the ideal shape of the bracket wings and their extremely practical deep tie wing undercuts make even multiple ligation very easy.
