

## OSE Roth Technique Brackets

- Precision milled from high quality stainless steel. Smooth, rounded contours for patient comfort
- Bracket identification has permanent markings on distal gingival tie wings— Red on maxillary; black on mandibular
- Chamfered lower anteriors to reduce incisal interference in deep bite cases
- Gingivally offset posterior brackets promote patient comfort and allow easier placement of ligatures and auxiliaries
- 80 gauge mesh backed bases provide deeper undercut for more positive mechanical bond
- Mini-design *and* **MADE IN THE U.S.A.**
