## Redi-Chem® Developer & Fixer

*Specifically formulated to meet the highest professional standards - assuring superior image quality and clean processor performance*

**"A" Developer** is a one-part, ready-to-use formula designed for superior processing of all types and brands of dental x-ray film in automatic roller transport processors. Formulated to resist oxidation, this clean running developer provides consistent, sharp images film after film, regard less of film intermixes.

**"B" Fixer** is a one-part, ready-to-use formula designed for excellent clearing and hardening of all types and brands of dental x-ray film. This non-sludging fixer is formulated especially for automatic roller type processors, but works equally well as a hand tank fixer.

**"C" Sold in Cases** - the economical alternative - each case includes 2 one gallon **Developer (A)** and 2 one gallon **Fixer (B)**.
