## Bandhorn™ Tissue Retractor

Patent Pending OrthoGap Inc.

Allows for early banding of the second molars

The smaller portion of this instrument fits into the central groove of the molar and allows for tissue retraction distally. Once the distal marginal ridge is reached, the larger portion slides gingivally into the sulcus while retracting any tissue remaining on the marginal ridge. Smooth® rounded edges for patient comfort. Autoclavable up to 250 F (121 C).

# 4010-Z **\$9.95 ea.**
