

## TABLE OF EXPANSION SCREWS MEASURES AND PRICES

(Pictures and descriptions shown below and on pages 46,49 & 52)

Made of stainless steel chromium-nickel alloys, absolutely resistant against oral acidity. Distinguished by a miniaturized design, highest stability, circular retention grooves, a stop preventing the screw from loosening and an imprinted arrow indicating the opening direction. All sizes in chart are given in mm. All screws are supplied with a key. Expansion screws may be mixed to reach quantity price.

### Rapid Palatal Expansion Screws

See page 46 for pictures and description.

### Miniaturized Multi-Sector Screws

0670-205

0670-206

Bertoni Anatomic Three-Dimensional Expansion Screw. Made of V<sub>2</sub>A non-corrosion stainless steel. Combined transversal and protrusion screws for Y-plates. The arrangement of offset levels corresponding with the palatal arch allows much thinner plates to be made.

**0670-205**— three independently acting screw branches. Each sector can be adjusted individually.

**0670-206**— for two symmetrical and one protrusion movement.
