

Variety® & Variety® SP Half Screw

0602-806 Variety® Half Screw

This versatile, multi-functional mini-expansion screw can be used in the upper and lower jaw. The maximum expansion of 12mm, combined with the safety system that prevents unwanted turning back, guarantees excellent treatment results. Screw thickness 4mm, width 8.6mm 4 x 1/4 turns = .80mm. Stainless steel key included with each screw.

0602-809 Variety® SP (For Small Palates)

The unique design allows for easy bending of the break-resistant retention legs very close to the screw housing. 12mm expansion. Stainless steel key included with each screw.

Diastema Closure Kit

This diastema kit includes two bondable tubes manufactured to accept the kit's closure springs. Suitable for use in conjunction with the company's central-to-central bondable retainer to maintain the closure after the case is complete.

F394-090 Kit of 2 tubes & 1 spring **\$13.95**

Direct Bond Retainer

To help retain the closure after the case is complete, the central-to-central bondable retainer is recommended. This device is made up of two bondable pads connected by a flat bar that allows for the two centrals to remain in position after the diastema has been treated. Sold in eaches.
