

Mini Stainless Steel Expansion Screw

Skeleton design for transversal expansion and distalization, especially for narrow upper arches. White plastic directional arrows.

0600-300

Medium Stainless Steel Expansion Screw

Skeleton design for transversal expansion and distalization. Neon yellow plastic directional arrows.

0600-301

Maxi Stainless Steel Expansion Screw

Skeleton design for transversal expansion in the upper arch. Neon yellow plastic directional arrows.

0600-302

Magnum Stainless Steel Expansion Screw

Extra strong, skeleton design for transversal expansion in the upper arch. Neon yellow plastic directional arrows.

0600-303

Medium Stainless Steel Sectional Screw, straight

Neon yellow plastic directional arrows.

0600-500

Medium Stainless Steel Sectional Screw, angulated

Guide pins angulated for better placement in acrylic. Neon yellow plastic directional arrows.

0600-501

Mini Stainless Steel Sectional Screw

Straight guide pins for movement of individual teeth. Arrow indicating the opening direction.

0600-502

Mini Stainless Steel Sectional Screw, angulated

Skeleton design for transversal expansion and distalization, especially for narrow upper arches. White plastic directional arrows.

0600-503

Medium Stainless Steel Retraction Screw

With straight U-shaped guide pins. For closing diastemas.

0600-600

DENTAURUM Expansion Screws

Dentaurum expansion and special purpose screws for various treatment plans. Outstanding quality achieved by computer assisted design and close production tolerances maintained by precision robots. Each screw is supplied with a key.

- Built in stops prevent screws from coming apart
- Precision thread friction for precise opening of screw
- Holes in body of screws for better retention in acrylic
- All screw dimensions given below in mm

Catalog #	Thick	Width	Length	Exp	Turn	Each
0600-300	3.0	6.5	10	6.5	0.7	\$2.99
0600-301	3.1	7.3	11	7.5	0.7	\$2.99

0602-606	3.0	6.3	16	4x3	0.35	\$19.89

Mini Stainless Steel Retraction Screw

With straight U-shaped guide pins. For closing diastemas.

0600-601

Stainless Steel Three Dimensional Screw (Steiner)

Separately adjustable central connector allows individual fitting to different palate shapes. Strengthened guides. Two activation points.

0602-604

Mini Stainless Steel Three Dimensional Screw (Bertoni)

Three independently controlled movements. Strengthened guides for Y-plates.

0602-605

Mini Stainless Steel Three Dimensional Screw (Bertoni)

Combination lateral and protrusion screw for Y-plates. Strengthened guides. Two activation points.

0602-606
