

# POZZI® Cold Cure Ortho Resin

## 1 lb. Kits and Components

Pozzi Ortho Resin is a self-curing, high impact acrylic that was developed for orthodontic use in making strong and attractive appliances and retainers. The powder is a "Lo-Flo" formulation that will rapidly absorb the monomer and will not slump, flow or run. Plastic thickness and form can be rapidly accomplished because, when Pozzi Ortho Powder and Liquid are sprayed on the stone cast, the acrylic will stay put and even. Kit contains: 16 oz. Powder, 8 oz. Pink or Clear Liquid.
