

Neocryl™ Orthodontic Acrylic Resin

Neocryl™ is designed to create semi-translucent brightly colored appliances that encourage patient compliance. If the color liquid is used, the appliance will be translucent. If the color powder kit is used, the appliance will be opaque. Neocryl™ powders are formulated extra fine for quick absorption, creating a stronger, more durable appliance, and eliminating slumping or running of the material during fabrication. Longer working time gives the technician greater design and detail time. All Neocryl™ products are non-yellowing.

Neocryl™ Powder Kit

Powder Kit includes the following colors:
Go Green, Real Red, Boldly Blue, Yelling Yellow, Poppin Pink and Crystal Clear

0921-610

\$87.75 ea.

Neocryl™ Splint Kit

Neocryl™ Splint is an extra strong, high density acrylic resin designed to make orthodontic splints that help patients who have TMJ or a tendency to grind at night. It will not chip, break, or wear easily and is crystal clear in the patient's mouth. Better liquid absorption prevents running and slumping, resulting in a stronger, more durable appliance that will not yellow.

0921-636

\$69.75 ea.
