Introduces the new

Stealth

Form-follows-function, introducing the new Leone miniexpansor screw. The new Stealth™ Slender Expansor® Screw is very compact with design innovations that make it ideal for smaller palates where application size and versatility are top priorities. Competing products simply do not measure up; they tend to be larger with more cumbersome mechanics and inferior construction techniques that become plaque traps. The Stealth™ Slender Expansor® Screw is a superior product with these many advanced features:

- Very compact and strong mechanism, body bulk is minimized
- No external weld marks, will not be a plaque collector.
- Arms are internally attached to resist stress point breakage.
- Internal mechanism absolutely reliable for stability and precision
- Extra long arms to easily form appliances without soldered extensions.
- Each screw comes with one Leone Smart Swivel Key™.
